ROSS & BARUZZINI HIRES DIRECTOR OF INFRASTRUCTURE
-Strategic hire to strengthen water/wastewater utility projects in the Midwest-

November 14, 2006, St. Louis, Missouri — Ross & Baruzzini, Inc., a leader in engineering and technology special systems design, today announced that Matt Moore has joined Ross & Baruzzini as the director of infrastructure. Moore joins Ross & Baruzzini with more than thirteen years of experience in infrastructure and environmental engineering, bringing a wide background of project management and design. During his career, Moore has had direct involvement in a number of multi-million dollar projects, including industrial site development, airport improvements, wastewater treatment plant expansion, and municipal water distribution projects. Moore will strengthen Ross & Baruzzini's significant practice in water/wastewater utilities in the Midwest, in addition to utilizing his civil and environmental engineering expertise to provide existing and new Ross & Baruzzini clients with project management and engineering services throughout the state of Indiana, the Midwest region and in additional strategic locations.

About Ross & Baruzzini, Inc.
