

Global

Ross & Baruzzini Global offers consulting, architecture and engineering services to clients around the world on projects of all sizes and complexity. Our international projects span over 4 continents and include projects at over a dozen locations worldwide including: Qatar, Mexico, Malaysia, Egypt, Saudi Arabia, Nigeria, Canada, Colombia and Iraq.

Ross & Baruzzini Global is structured to provide a full range of project delivery services to support clients worldwide. We provide systems solutions that are designed and engineered along with exceptional service and technical knowledge to every phase of a project. The combination of a loyal client base and steady growth enables us to attract and retain the industry's top talent. As a result of our sound business strategy we are prospering in diverse markets worldwide. Through specialized experience and global reach, we strive to better understand and overcome the challenges that face multi-national clients, develop comprehensive solutions tailored to the most complex issues, and serve a meaningful role in building a better world.
